

# ■ BIRD SORT 2

## Ultimate Strategy Guide

Welcome to the ultimate Bird Sort 2 strategy guide! This guide will help you master the game and reach Level 10 and beyond with expert tips, proven strategies, and insider secrets.

### ■ Understanding the Basics

Bird Sort 2 is a puzzle game where you must organize birds by color. The core mechanic is simple: tap birds to move them between branches. However, there's a crucial rule - only birds of the same color can stand together on a branch. This simple rule creates surprisingly complex puzzles that require strategic thinking.

### ■■ Master Your Tools

**Back Button:** Undo your last move when you make a mistake. Save these for critical moments!

**Extra Branch:** Adds one more branch temporarily. Use this when you're completely stuck.

**Shuffle:** Randomly reorganizes birds. Best used early in impossible-looking levels.

**Time Freeze:** Stops the timer. Essential for time-limited levels with bombs.

### ■ Level 10 Complete Walkthrough

Level 10 is where many players first struggle. Here's your step-by-step guide:

**Step 1:** Identify Empty Branches

Start by locating all empty branches. These are your "working spaces" for sorting.

**Step 2:** Find Single-Color Groups

Look for branches that already have 2-3 birds of the same color together. These are easiest to complete first.

**Step 3:** Create Temporary Holding Areas

Move birds you don't immediately need to empty branches to create space for sorting.

**Step 4:** Work Color by Color

Focus on completing one color at a time, starting with the color that appears most frequently.

**Step 5:** Save Your Tools

Don't use the Back Button or Extra Branch unless you're truly stuck. You'll need them for harder levels.

## ■ Pro Player Strategies

### **The Bottom-Up Method:**

Always start by moving birds from the bottommost positions. This prevents you from trapping birds underneath others of different colors.

### **Color Frequency Analysis:**

Before making your first move, count how many birds of each color appear. Complete the most common colors first to create more working space.

### **The Two-Branch Rule:**

Never fill more than two branches with the same color until you have a complete set ready. This keeps your options flexible.

### **Bomb Management:**

For levels with bomb birds (■ symbol), eliminate the bomb birds LAST, not first. This gives you maximum time to solve the puzzle.

### **Sleeping Bird Strategy:**

Sleeping birds (■ symbol) wake up after a few moves. Plan your moves so these birds wake into positions where they can be easily sorted.

## ■ Avoid These Mistakes

### **Mistake #1: Moving Too Quickly**

Take 5-10 seconds to study the level before making any moves. A quick plan saves time overall.

### **Mistake #2: Filling All Empty Branches**

Always keep at least one branch completely empty for emergency shuffling.

### **Mistake #3: Using Tools Too Early**

Save your tools for levels 20+ where they become essential. Early levels are solvable without them.

### **Mistake #4: Ignoring Patterns**

Each level type has patterns. Learn to recognize them and apply proven solutions.

## ■ Smart Coin Management

Coins are precious - here's how to maximize them:

**Watch Ads for Free Tools:** Always choose ad rewards over spending coins when possible.

**Daily Rewards:** Log in every day to collect free coins and bonuses.

**Don't Waste on Easy Levels:** Save your coins for genuinely difficult levels (usually 50+).

**Complete Daily Challenges:** These give bonus coins and should be your priority.

**Three-Star Levels:** Replaying levels for three stars gives coin bonuses.

## ■ Advanced Techniques

### **The Cascade Method:**

When you have multiple birds of the same color scattered across branches, create a "cascade" by moving them one branch at a time toward a target branch. This prevents mistakes.

### **Pattern Recognition:**

After level 20, you'll start seeing repeated patterns. Some levels are mirrors or rotations of earlier levels. Recognize these to solve them faster.

### **The Preview Strategy:**

Before each move, mentally preview where the bird will land. Ask yourself: "Does this move help or hurt my overall goal?"

### **Speed Running:**

For time-limited levels, sacrifice perfection for speed. A 2-star completion is better than running out of time.

## ■ What's Coming Next

**Level 11-15:** Introduction of 4-color puzzles. The difficulty jumps significantly.

**Level 16-20:** First appearance of bomb birds. You'll need good time management.

**Level 20+:** Sleeping birds are introduced. These wake up after 3 moves.

**Level 30+:** Combination levels with bombs + sleeping birds. This is where the game gets truly challenging.

## ■ Final Tips for Success

**Practice makes perfect!** Every level teaches you something new. Don't get discouraged by failures - even expert players need 2-3 attempts on difficult levels.

**Join the community:** Share strategies and get help from other players in forums and social media groups.

**Have fun!** Remember, Bird Sort 2 is meant to be relaxing and enjoyable. Take breaks if you get frustrated.

*Good luck reaching Level 100 and beyond! You've got this! ■■*
